# UTKARSH KUSHWAHA

Greater Noida, Uttar Pradesh, India
utkarshkushwaha6307@gmail.com linkedin.com/in/utkarsh-kk github.com/utkarshkushwaha159

## Summary

B.Tech CSE student (CGPA 8.54) with hands-on experience in software development, web technologies, and open-source collaboration. Proficient in Java, Python, C, and JavaScript with a strong foundation in Data Structures & Algorithms and OOP. Track record of building end-to-end systems through internships, hackathons, job simulations, and independent projects.

## Education

**Bachelor of Technology — Computer Science & Engineering** *Aug 2025 – May 2029 (Expected)*
Noida Institute of Engineering & Technology (NIET), AKTU Lucknow **CGPA: 8.54**

## Technical Skills

**Languages:** Java, Python, C, JavaScript
**Web Development:** HTML5, CSS3, JavaScript, Responsive Design, Frontend Development
**CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Architecture
**Tools & Platforms:** Git, GitHub, VS Code, GDB, Flask, SQLite, Chart.js, Leaflet.js
**Areas of Interest:** Software Engineering, Full-Stack Development, AI/ML, Cybersecurity, IoT, Cloud

## Experience

**Web Development Intern** | InAmigos Foundation (IAF) *Noida, India | Jun 2026 – Jul 2026*
- Developed and maintained responsive web pages using HTML5 and CSS3, improving cross-device compatibility.
- Enhanced website UI/UX, resulting in improved visual consistency and user experience across key pages.
- Optimized website performance by auditing and refactoring existing content and page assets.

**Open Source Contributor** | GirlScript Summer of Code (GSSoC) 2026 *Remote | May 2026 – Jul 2026*
- Contributed to real-world open-source repositories on GitHub — fixed bugs and shipped new features across multiple projects.
- Built and improved frontend components in HTML, CSS, and JavaScript following open-source best practices.
- Collaborated with project maintainers via GitHub issues, pull requests, and code reviews; practiced Git-based version control.
- Improved project documentation and added test coverage to increase overall code quality.

**Technology Job Simulation** | Deloitte Australia (Forage) *Virtual | Oct 2026*
- Completed a Deloitte Australia Technology job simulation involving hands-on coding and development tasks.
- Wrote a proposal for building a dashboard.

## Projects

**Digital Complaint Management System (DCMS)** *Python, OOP, SQLite*
- Designed and built a full-featured complaint management system applying core OOP principles (encapsulation, inheritance, polymorphism).
- Produced comprehensive documentation covering architecture, UML class diagrams, and test cases (30+ pages).

**Watt's Off — Energy Consumption Anomaly Detection** *Python, Flask, SQLite, JavaScript, Chart.js, Leaflet.js*
- Built an energy-monitoring platform that detects abnormal usage patterns using Python-based statistical anomaly detection.
- Integrated geographic data visualization via Leaflet.js and real-time dashboards via Chart.js for citizen and officer portals.

**ATM Transaction Logging & Cash Flow Tracking System** *Java, OOP, DBMS*
- Developed a transaction management application supporting real-time logging, cash-flow analytics, and audit reporting.

**IoT Smoke & Fire Detection System** *Python, IoT, Embedded Systems*
- Designed a real-time hazard detection system monitoring smoke/fire sensors with automated alert generation.

## Achievements & Hackathons

- **Smart India Hackathon 2026 (SIH) — Team DoraByte** Selected Team, NIET Internal SIH 2026
  Designed an AI-powered real-time Stress & Trauma Assessment Module using NLP, Speech Analytics, and Emotion AI. Proposed a Stress Vulnerability Index (SVI) categorizing users into distress levels; included a Silent Distress Mode for discreet access.
- **IntrusionX — Cybersecurity Hackathon:** Competed across AI/ML security, web, blockchain, cloud, and IoT security tracks.
- **Paytm Build for India AI Hackathon:** Explored AI-driven tracks on merchant growth, financial journeys, and autonomous AI.
